

Michigan State University AVITI™ Grant Program

The AVITI Grant Program is an opportunity for you to push your research further and faster with free sequencing from Element Biosciences and the Michigan State University Genomics Core. Applying is quick, easy, and open to researchers in any field.

In 250 words or fewer, tell us how you will shift your science with a grant of sequencing services that includes:

- Each grant winner will receive 1 free Element flow cell enabling up to 1 billion 2x150 reads (2x150 high) or 300 million 2x300 reads (2x300 high)
- The MSU Genomics Core will provide sequencing services free of charge (library preparation is not included)

Application window: October 9th to November 8th, 2024

Awardees will be selected and notified by November 22, 2024

Up to 2 grants will be selected as winners from submissions
