

NGS Methods and Experimental Considerations

Every day, researchers are using Illumina next-generation sequencing (NGS) systems to better understand human health and disease, as well as gain more insights into non-human organisms. We are enhancing research in emerging fields, from plant genomics to microbiology. Our systems leverage the power of Illumina NGS technology in an accessible and cost-effective format, making it easy for Michigan State investigators to accelerate their research. Join us for this seminar to learn how you can expand your research with Illumina sequencing workflow.

When:

Wednesday, September 13, 2023

Agenda:

1:00 PM - 2:00 PM: Presentations

2:00 PM - 3:00 PM: Office Hours

Where:

Michigan State University, Food Safety & Toxicology Building,
Room #162

SPEAKERS

Kayla Zochowski

Sr Sales Specialist
Illumina, Inc.

Clarisse Román

Sr Field Applications Scientist
Illumina, Inc.

Christine Rygiel

Sr Territory Account Manager
Illumina, Inc.
